# About this Report

As part of its participation in The National Community Survey™, the Town of Flower Mound conducted a mailed survey of 1,700 residents. Surveys were mailed to randomly selected households in August 2019 and data were collected through October 2, 2019 (see the report, *The National Community Survey: Community Livability Report, Flower Mound, TX, 2019*). The results from this main survey effort represent the most robust estimate of your residents' opinions.

After the above data collection period was underway, the Town made available a web-based survey to its residents through a link on the Town's website. Visitors to the site were able to complete the survey for two weeks, starting on September 27<sup>th</sup>, 2019 and 875 surveys were received. This report contains the results of this opt-in administration of the web-based survey. These data were not collected through a random sample and it is unknown who in the community was aware of link on the Town's website; therefore, a level of confidence in the representativeness of the sample cannot be estimated. However, to reduce bias where possible, these data were weighted to match the demographic characteristics of the 2010 Census and 2017 American Community Survey estimates for adults in the Town of Flower Mound.

The results of the weighting scheme for the opt-in survey are presented in the following table.
