| Minor 2,028 sq ft tenant finish out for IPI Office<br>As for this minor finish out literally all we are doing is adding gypsum board to the inside of the exterior walls (as the frame cavity is currently exposed), filling in the slab leave out, leaving the existing concrete floor around it as is, adding a new lay in ceiling, adding 2 ground units to condition the space, and 2 interior walls and a door to create an IT room for the future tenants. No other work is being done. |               |                         |                                 |
